

Product Description

The equipment under test (EUT) is a transmitter with an integral antenna for a Radio Control Car operating at 27.145 MHz which is controlled by a crystal. The EUT is powered by a 9V battery. The EUT has two control levers and a button. The control levers control the Radio Control Car forward, backward and steering. And, the button controls the motion of the clamper on the Radio Control Car.

The brief circuit description is listed as follows :

- IC-U1 PTBA971P and associated circuit act as Control Unit.
- Q1 and associated circuit act as Oscillator.
- Q2 and associated circuit act as RF Output Amplifier.
