To Whom It May Concern:

A new data rate has been created for the Smart Meter communication module (FCC ID: OZFACXX20). The maximum possible time averaged transmit duty cycle has been reduced by a factor of 1.5; this is due to the higher data rate being able to acknowledge more devices with a single message. Since the RF exposure at the new data rate is lower it means that the RF exposure data and the user manual contain pertinent information for the existing data rate and new exhibits are not required.

A handwritten signature in black ink, appearing to read "M. Fairburn", with a horizontal line extending to the right.

Mark Fairburn
RF Design Engineer
