Federal Communications Commission
Authorization and Evaluation Division

Confidentiality Request regarding application for certification of FCC ID: OZFSC5420.

Pursuant to Sections 0.457 and 0.459 of the Commission's Rules, we hereby request confidential treatment of information accompanying this application as outlined below:

The schematic diagrams, block diagrams, product parts list, theory of operation, User Manual and pictures of the inside of the product contain information proprietary to Tantalus and form a basis of our intellectual property with respect to our product designs.

The above materials contain trade secrets and proprietary information not customarily released to the public. The public disclosure of these materials may be harmful to the applicant and provide unjustified benefits to its competitors.

Internal pictures and the User Manual have been included in the request for confidentiality because this is not a consumer device and cannot be easily accessed by the consumer. The device is sealed in a metal enclosure at the time of installation. Utility companies that purchase the communication modules have signed a NDA with Tantalus that protects Tantalus from disclosure of its intellectual property. A copy of the NDA that is made with all of our customers has been submitted with this application. In the definition section, "Confidential Information" states the following "*includes technical information (such as formulas, data, programs, methods, techniques and processes).*" this statement covers any technical information contained within the user manual or technical information that can be gleaned from studying detailed photographs of the product that clearly show part numbers. Section 2.10 states that the customer has no right to market or resell the products which therefore means that Tantalus products are not made available to any other person or person(s) that have not signed a NDA with Tantalus.

The applicant understands that pursuant to Section 0.457 of the Rules, disclosure of this application and all accompanying documentation will not be made before the date of the Grant for this application.

Sincerely,

A handwritten signature in black ink, appearing to read 'M. Fairburn', with a horizontal flourish extending to the right.

Mark Fairburn
RF Design Engineer
