RE: FCC ID: OZGV680-CHXD_ATCB005567
Attention:

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please provide the FCC/IC label exhibits in English.
2. Please note that Industry Canada does not allow wild card characters in the Product number for IC certification. The interpretation from IC is "Special characters and Wild card characters: Special characters are not allowed in the UPN but are allowed in the model number. Wild card characters are not allowed in the UPN number. Wild card characters are defined as a series of identical characters used for the purpose of identifying multiple products." Please note that the IC number for this device is 850L-V680CHXD. Please note that while not a series of identical characters, it does appear to indicate that the "X" in the IC number refers to multiple model numbers. Please explain and show how this IC number is not using the "X" as a wild card.
3. Please provide an explanation in English as to how the label is permanently affixed to the device.
4. Please note that the test report does not clearly state that radiated emissions below 30MHz was done using a Magnetic Loop Antenna. Please note that the reference to a loop uncertainty number does not meet the requirement to clearly identify the use of a mag loop antenna below 30MHz. Please correct the report to properly identify the antenna(s) used in each radiated emissions test.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
