Hi Jessica:

Q#1: The power rating specified in user manual page 22 do not agree with the specification indicated in theory of operation and the rating shown of the label of power adapter, please explain.

[Ans: Please see page 22 on the revised usermanual](#)

Q#2: User manual does not include the information required per 15.21 of FCC rules, please provide revised user manual.

[Ans: Please see page 23 on the revised usermanual.](#)

Q#3: Theory of operation indicated WPSM54G V1.1 which does not agree with model designation listed in the test report. Please explain.

[Ans: Please see the reivsed Operation Description.](#)

Q#4: Look into page 47 to page 52 of test report; some frequencies are applying the limits of 20dB down of fundamental field strength. Please provide fundamental field strength data.

Ans: [Ans: Please see page 47~52 on the revised test report.](#)

Best Regards,

Mike Kuo

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.
