

IP806GA/GB Operational Descriptions

The IP806GA/GB Wireless ADSL Firewall Router provides continuous, high-speed 10/100 Ethernet access between your wireless and Ethernet devices. The IP806GA/GB wireless router enables your entire network to share an Internet connection through the built-in ADSL modem that otherwise is used by a single computer. With minimum setup, you can install and use the router within minutes.

The IP806GA/GB wireless router provides multiple Web content filtering options, plus e-mail browsing activity reporting and instant alerts. Parents and network administrators can establish restricted access policies based on time-of-day, Web site addresses and address keywords, and share high-speed ADSL Internet access for up to 253 personal computers. The included firewall and Network Address Translation (NAT) features protect you from hackers.
