RE: SerComm Corporation

FCC ID: P27IP906SM

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Section 15.15(b) prohibits adjustments of any control by the user that will cause operation of a device in violation of the regulations. Accordingly, any proposal to allow the end user to choose extended channels on frequencies outside of an allowable frequency band in the USA is not acceptable. For example, a WLAN device operating according to Section 15.247 on channels 1-11 between 2.4 - 2.483.5 GHz must not have any user controls or software to allow the device to operate on channels 12 and 13 which are outside of the allowed USA band. For instance, the user should not be able to select alternative countries which would allow different channel plans outside of the allowed USA band. Please explain how this device is compliant to this requirement.
- 2) Information regarding compliance to 15.407(c) could not be located in the application. Please provide.

Timothy R. Johnson
Examining Engineer
