

Response for Request for information (request sent 12/27/01) for

Re: FCC ID: P2SNTGADV1201
Applicant: Neptune Technology Group
Correspondence Reference Number: N/A
731 Confirmation Number: N/A

1.) The Label is grainy and unreadable. It appears to list the wrong FCC ID. Submit new label.

[A new exhibit has been uploaded.](#)

2.) The Label Placement drawing is inconclusive. Please submit revised drawing

[A new exhibit has been uploaded.](#)

3.) The Block Diagram does not list the RF circuitry. Please provide documentation on the AM Hybrid Tx.

[The RF transmitter is actually a custom chip designed for Schlumberger \(now Neptune\). Specifications regarding this chip have been uploaded.](#)

4.) Is this device capable of transmitting while being recharged? If so, than AC Powerline Conducted tests under 15.207 should be reconsidered.

[No, this device is not capable of transmitting while plugged into a wall charger. In order to use the device it must be disconnected from the wall charger.](#)

5.) User's manual does not conform to the requirements of 15.21.
