American TCB 6731 Whittier Ave. Suite C110 McLean VA 22101

Gentlemen:

The enclosed documents constitute a formal submittal and request for a Class II Permissive Change pursuant to Subpart C of Part 15 of FCC Rules (CFR 47) regarding changes to intentional radiators. A change is being proposed to the Neptune Technology Group Inc. model Pocket ProReader RF, which would result in changes to the performance characteristics originally reported to the Commission. Since the Pocket ProReader RF is presently certified, an emissions test has been performed to demonstrate that it continues to comply with FCC Part 15 limits for intentional radiators. The changes are detailed on page 8 PROPOSED MODIFICATION DETAILS of the report.

The following remain unchanged from the original application for a grant of authorization and, therefore, have not been included with this application: FCC ID label; label location; Block Diagram; external appearance; Operator's Manual.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is enclosed.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Briggs

Director of Engineering
