

## **FCC ID: P2VWIRELESSKIT**

### **Circuit Description**

The 17.734476MHz (x 5 to 88.67MHz) crystal oscillator drives the base of Q3 the final/buffer amplifier. The modulation provided by Mic. The output of Q3 has the matching network consisting of L1 and C13 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

#### **Antenna, Ground and Power Source**

The antenna consists of a 12cm long of wire. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 3 Volt ("CR2032" button cell x 1) primary battery
