Maximum Permissible Exposure (MPE) Compliance Statement for the SpotCell 111/112 (1900MHz PCS) Adaptive Repeater

The SpotCell 111/112 (1900MHz) equipment has been tested and the performance characterized in accordance with the MPE requirement of CFR 47, Part 1.1310.

The system is a low power adaptive repeater, having integral antennas built into the CU and DU modules. At maximum operating frequency of 1985MHz the MPE limit is $1\text{mW}/\text{cm}^2$. The SpotCell 111/112 complies with this limit at the following line of sight distances from the antenna element:

DU: 8.9cm
CU: 0.9cm

A warning statement for the DU is provided in the Installation Manual. The integral radome on CU provides $> 1.5\text{cm}$ physical separation from the antenna so that no warning statement is required for this module.
