RE: Mitac International Corporation

FCC: P4Q-2007VEN3001

After a review of the submitted information, I have a few comments on the above referenced Application. Depending on your responses, kindly understand there may be additional comments.

1) The PC letter mentions that the circuitry change was a new processor. However it appears that much of the circuitry of the device actually appears to be different. Please provide further information as to these various changes and how they can be considered Permissive.

Original Application   New PC Application
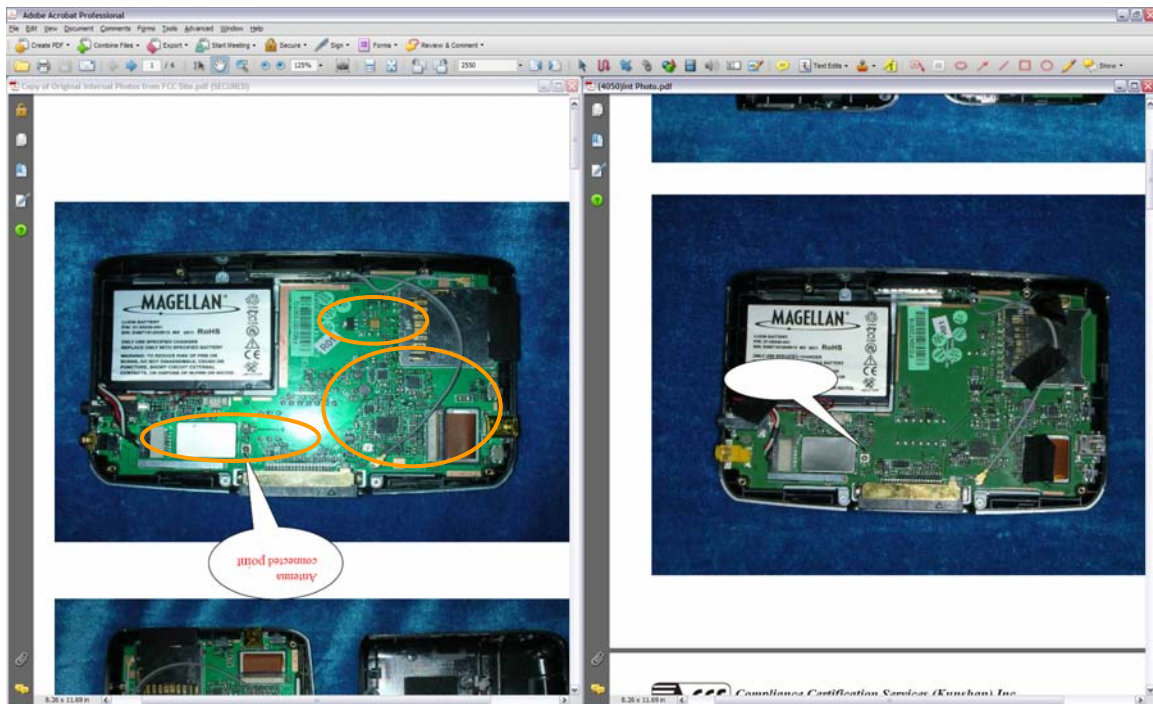

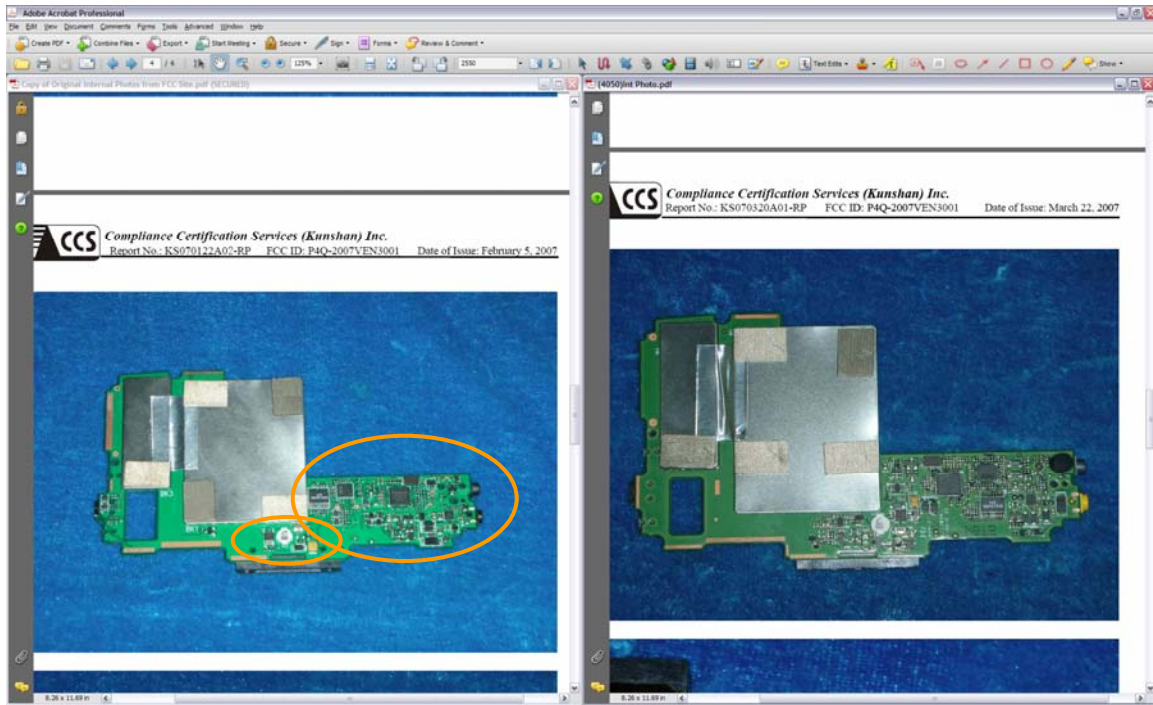

2) The labeling provided is too low a resolution to read. Please provide a higher resolution label. Additionally, note that IC requires 3 items on the label, (model, applicant, and Certification No. as Certified). The label does not appear to applicant for this application. Please revise.
