主旨 : MITAC International Corp., FCC ID: P4Q-MDPNA470T, Assessment NO.: AN06T6262, Notice#1

Dear Jessica Ho,

I have reviewed the above referenced TCB application and find that the following items need to be addressed before the review can be completed:

1. The test report does not specify the version of ANSI C63.4 measurement procedure that was used. Please update the test report to document the version of ANSI C63.4 that was used for measurements. Additionally, the test report signature page seems to be from an ETSI EN 300 328 report. Please correct this page of the report as well.

**Ans:** Sorry, we replaced wrong page, please have the revised test report.

2. The Operational Description exhibit contains no technical description. Please provide a technical description of the Bluetooth circuitry in this device.

**Ans:** Client provide the operational description again.

11/3/2006

3. There are several FCC requirements that are not yet declared as being compliant in the application referenced above. These requirements are automatically deemed compliant if the device meets the Bluetooth Specification. There is no statement that the device complies with the Bluetooth specification. Please either provide a declaration with the Bluetooth Specification (please include version) or provide individual declarations of compliance with the following items needed for FCC 15.247 compliance:

Is the hopping sequence pseudorandom, based on the technical description?

Is each channel used equally on average, based on the technical description?

Does the associated system receiver have a compliant input bandwidth, based on the measured 20 dB emission bandwidth?

Does the associated system receiver have the ability to hop in synchronization with the transmitter, based on the technical description?

Does the design of the frequency hopping system allow it to comply with all pertinent requirements when presented with a lengthy data stream?

Does the frequency hopping system comply with the non-coordination requirement?

[Ans:](#) Please have the BT declaration letter.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the e-mail address listed below the name of the sender.

Best regards,

Chris Harvey
