

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

February 2, 2007

RE: Mitac International Corporation

FCC ID: P4Q-MIOC720

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The FCC Logo has been removed from the label. Shall I assume that you wish for an additional Certification as a Class B peripheral?
- 2.) I do not find any additional data to address "Time of Occupancy". Bluetooth transmitters typically have three different dwell time settings. Please provide dwell time data for all operational modes (pages 25-26).
- 3.) I do not find any additional block diagram exhibit. Please see Rule 2.1033(b)(5). What I want is a complete block diagram associated with how the BC43B143A Bluetooth solution creates an RF signal, modulates and amplifies before passing to the antenna.
- 4.) There appears to be a mis-labeled document (attached). I am missing a Confidentiality Request letter signed by Joe Yang. Please provide.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
