Ref: FCC change of Identification for FCC ID: 2ALBD-PT30

Dear Examiner,

Our company Mitac International Corp. is requesting a change of Identification for FCC ID: 2ALBD-PT30 granted on 04/17/2017.

We are planning to market the original product with our own FCC Identification and our own Model number. All the other aspects of the product including schematic, PCB layout, components, antenna and enclosure will remain unchanged.

The original equipment was labeled as follows:

Model: PT30
FCC ID: 2ALBD-PT30
Grant date: 04/17/2017

The equipment sold by Mitac International Corp. will be labelled with the Magellan brand and with the following identification:

Model: MGNBDBA
FCC ID: P4Q-N557P

All other aspects of the product will remain unchanged. As such we believe that all the tests that have been performed on the product with the original FCC ID do apply to the product sold by Mitac International Corp. under the Magellan brand.

Sincerely,

A handwritten signature in black ink, appearing to read "Ruey-Yuan Chen".

Ruey-Yuan Chen

Director
