Scott McCutchan.vcf

Mr. Fujimoto,

In order for processing of this application (FCC ID: P4U-VRTXM) to continue, the following issue(s) will have to be addressed:

1) The data sheets in the test report show that the fundamental emission was averaged. For transmitters operating under section 15.249, the quasi-peak value of the fundamental must comply with the limit.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted.

Please upload your response to our electronic filing website using a correspondence number of "P4U-VRTXM-1".

If you have any questions, feel free to contact me.

Best regards,

Scott McCutchan

<b>Correspondence Number</b>	<b>Memo</b>
<b>P4U-VRTXM-1</b>	<p><b>1) The data sheets in the test report show that the fundamental emission was averaged. For transmitters operating under section 15.249, the quasi-peak value of the fundamental must comply with the limit.</b></p> <p><b>Response: The test report has been revised so that the data sheet now reads quasi-peak for the fundamental readings. The readings were quasi-peaked but the column reading "average or quasi-peak" wasn't changed to show "QP" for the fundamental. Please see the revised test report -- note the front page has been scanned in because of errors with the digital signature that causes the report body to get corrupted when trying to sign.</b></p>
