WIRELESS
MATRIX

Declaration of Configuration
March 9th, 2009

To Whom It May Concern,

The Wistron NeWeb DCMA-82 802.11 module used in the Communicator 1000 will
only operate in B or G modes. It is not possible for the operator to use the DCMA-82 in
turbo mode as this mode is not supported in the Communicator 1000 firmware.

Sincerely,

Ted Carey
Director, R&D Hardware Engineering, Wireless Matrix
