Request for Grant Change

FCC ID: P5L-FWTG32

Dear Sirs,

Can you please change the above Grant which lists an incorrect frequency range of 842.2 - 848.8MHz. This is a typographical error.

Please change the Grant to show 824.2 - 848.8MHz.

The technical content of the filing is unaffected as the testing was carried out in accordance with the 824.2 - 848.8MHz frequency range.

Thank you.

A handwritten signature in black ink, appearing to read 'J. L. Bellairs', with a long horizontal stroke extending to the left.
