Description of Changes Made to Model ALR-9640 Reader
FCC Equipment ID P65ALR-9640
11/18/04

Alien has made changes to its existing equipment for the above grant and performed required testing on these changes to assure compliance to FCC part 15.247 requirements. The following is a description of the changes made:

Changes made: The firmware was modified to improve the accuracy of the carrier modulation. The spec calls for two and six microsecond on times for ones and zeros, the older firmware left the carrier on slightly longer for both the one and the zero.

Alien Technology requests that this Class II permissive change be approved at the earliest convenience.

Sincerely,

A handwritten signature in black ink, appearing to read 'Richard Davidson', written over a dotted line.

Richard Davidson
