Description of Changes Made to NanoScanner Reader  
FCC Equipment ID P65BHNPR001  
Class II Permissive Change  
5/30/2003

Alien Technology has made changes to its existing equipment for the above grant and performed required testing of these changes to assure compliance to FCC part 15.247 requirements. The following is a description of the changes made:

Changes Made: An antenna with 6 dBi gain manufactured by Alien Technology, model LP91501, is being included as one of the antenna's that can be used with the NanoScanner Reader under the above grant. It is requested that this antenna be included with other antennas in the certification for this radio and which are presently being utilized on equipment under the existing FCC grant.

Alien Technology requests that this Class II permissive change be approved at the earliest convenience.

Sincerely,

A handwritten signature in black ink, appearing to read 'Robert Martin', written in a cursive style.

Robert Martin  
Sr. Compliance Engineer
