Bluetooth antenna -
external view

Bluetooth antenna - connection to chassis assembly

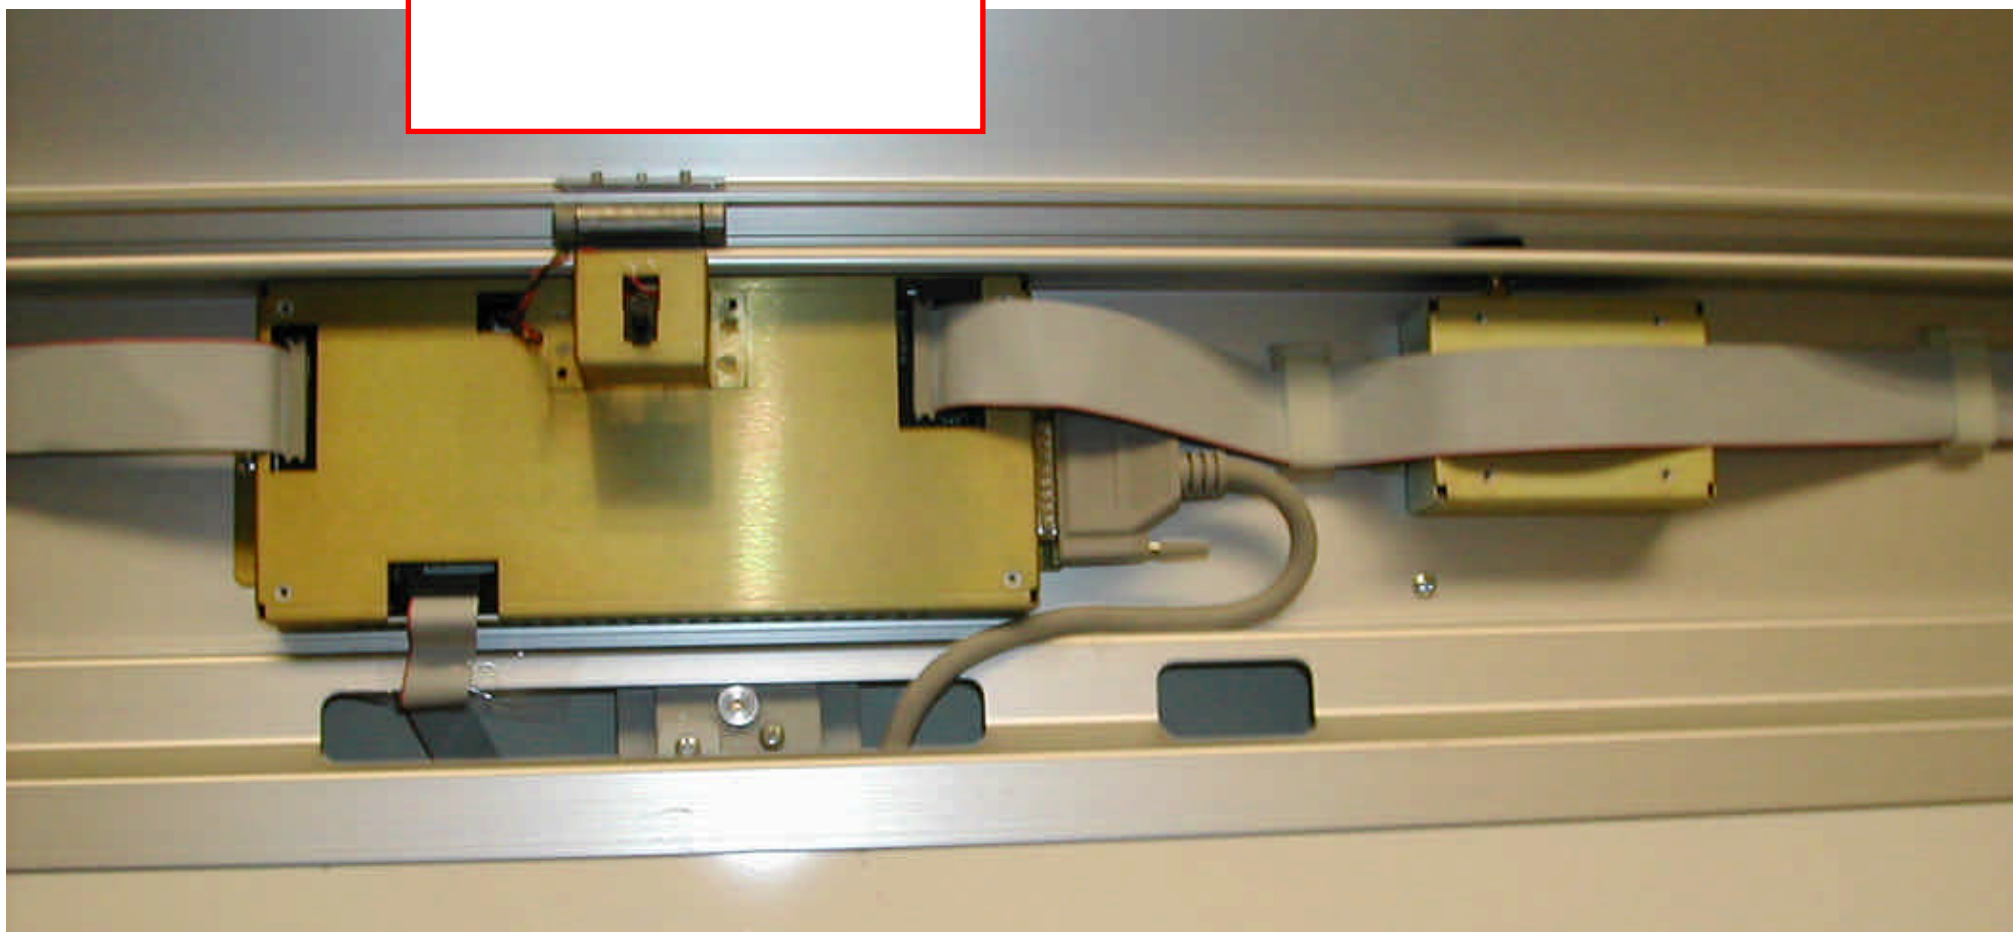

The image shows a close-up of a Bluetooth antenna connection. A black plastic component, likely the antenna, is mounted on a metal chassis. A small, dark, rectangular component is visible on the chassis, which is the connection point for the antenna. A white, flexible, braided cable is connected to this point. The background is dark and out of focus.

Bluetooth antenna connection to chassis assembly

The image shows a close-up of a mechanical assembly. A silver-colored metal plate, which is part of the chassis, is mounted with two screws. A brass-colored antenna is attached to the plate. A black circular component is visible above the antenna. In the foreground, a white, ribbed flexible cable is visible. The background is dark and out of focus.
