

Manufacturer Statement to RF Exposure

Due to the following properties of this equipment RF exposure/SAR requirements are not applicable for this equipment :

1. Maximum power output level (E.I.R.P): **< 2 dBm**.
2. Intended to be used on a distance of more than 20 cm from the Human Body, because the equipment is a LAN Access Point and has to be used stationary (power supply, LAN Access required). For details of installation please refer to the user manual included in this file.
