

Information to the identification label

1. General

The FCC identifier **FCC ID: P6L-SieMo-S50037**

is displayed on the identification label, which will be located in the technical description/ installation manual and on the packaging of this radio module. Due to the small size of this Bluetooth radio module and, because this radio module intended to be integrated/installed in OEM products/applications it is not practicable to place the label including the FCC statement on it (label would be not visible !). Therefore the label, the following FCC compliance statement and the note for the user will be placed in the technical description/ installation manual of this radio module:

This *Bluetooth* radio module complies with part 15 of the Federal Communications Commission (FCC) rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Note that any changes or modifications to this equipment not expressly approved by the manufacturer could void the user's authority to operate this equipment.

For OEM products/applications integrating this radio module an auxiliary label will be provided in the packaging with an instruction to place the label on an exterior surface of the device such that it will be visible upon inspection in compliance with the modular approval guidelines of the FCC. This auxiliary label will be exactly identical to the label mentioned below.

2. Draft version of the identification label

Draft version of the identification label of this radio module is included in this file and named as follows:
