TH-2890
Professional Two-way Radio

Hello

Thanks for purchasing HQT TH-2890. This radio boasts of good design, powerful, stable performance and is easy to operate. We are confident that the quality and functionality of this radio will satisfy you.

To make your full understanding of the machine before use, please read this manual carefully.

Welcome to use

HQT

two-way radio

- Ergonomic & Light design
- 199 Channels
- LCD Display with Backlight
- Dual frequency Channel Receiver
- Frequency Reverse
- Keyboard Operation
- VFO/MR Mode

TH-2890

- FM Radio
- Remote Stun/Kill
- CTCSS/CDCSS
- 2 Programmable Keys
- Auto Battery Save
- Wired Clone
- PC Programming

Safety Matters

Please read rules below. Nonobservance of these rules may cause danger or violation of law.

- Using this radio must comply with regulations of local government.
- Turn off the radio before you enter places of flammable or explosive environment.
- Do not replace or charge battery pack in places of flammable or explosive environment.
- Turn off the radio before you approach blast area and detonator area.
- Do not use the damaged antenna which may cause lightly burn on skin.
- Only qualified technician are allowed to maintain this two-way radio. Do not disassemble the radio by yourself.
- To avoid problem caused by electromagnetic interference or electromagnetic compatibility, please turn off the radio in places with "radio Transmitting Equipment Prohibited" mark, such as hospitals or other health care places. When taking a plane, turn off the radio if required.
- In a car with air bag, do not place the radio within possibly involved area when air bag expands.
- Do not expose the radio to direct sunlight or near heating devices for a long time.
- Keep the radio vertical and speak near the microphone during transmitting.
- Make sure that the antenna is 2.5 cm away from the body during transmitting if you carry the radio on your body.

Check Product

Please take the radio out of the box carefully. We recommend that you check the box for the items listed below before the disposal of packaging materials. If there is any item lost or damaged in handling, please contact distributor to confirm.

Battery Information

Suitable Battery Type

Please charge with HQT approved battery; for using other batteries may burst and cause personal damage.

Note:

1. Do not short-circuit the battery terminals or dispose the battery in fire. Never attempt to disassemble the battery pack.
2. Charge the battery in 0-45°C temperature. Otherwise the battery may not be fully charged.
3. Turn off the radio equipped with battery before charge. Use the radio while charging may interfere with the talk.
4. Do not pull/plug the adapter and the battery during charging to avoid interfere with the charging procedure.
5. When the battery power consumes quickly even if it is fully and correctly charged, it means the battery life is over and please replace with new battery.
6. Do not charge if the battery or radio is wet. Before charge, you should dry it with cloth to avoid danger.

Warning:

Conductive metals such as jewelry, key or decorating lace may result in short circuit and generate a large quantity of heat when coming to contact with battery electrodes. Treat any battery carefully especially when placing it into pocket, wallet or other metal container.

Charge Operation

Please charge as follows:

1. Turn off the radio.
2. Plug the AC connector of adapter into an AC output socket.
3. Vertically insert the battery or radio equipped with battery into the charger. Make sure the charger and battery is well contacted.
4. After the charger is electrified, the LED glows red and that means the charger is ready for normal charging; if the LED flashes red, it means the remaining battery power is too low and a trickle charge is in process. And after the battery power reached a certain amount during trickle charge, the charger automatically turns to normal charge mode.
5. The battery is fully charged when LED glows green. The charger stops charging automatically.

Note:

Trickle charge is not allowed to exceed 30 minutes. If the LED is still flashing in red after 30 minutes, it

means that the charger cannot provide power to the battery. Check if the battery or charger is damaged.

Cautions in Charging

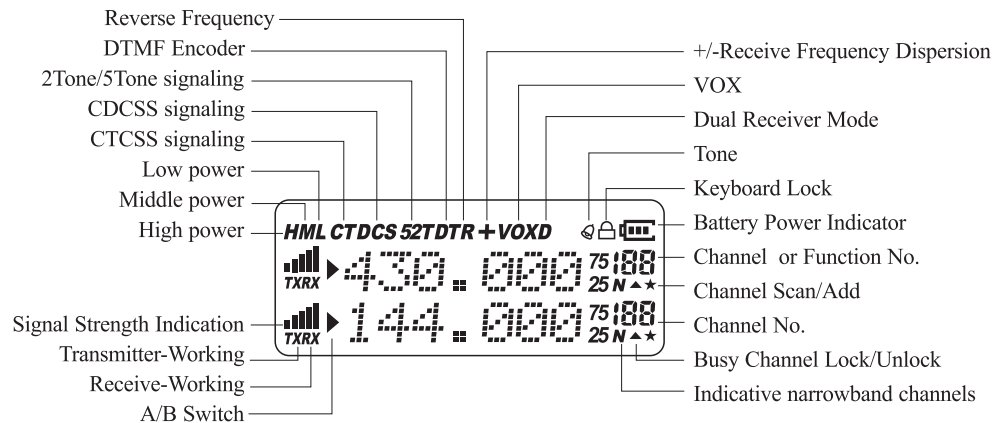

1. The battery is not charged in factory. Please charge the battery before initial use or after long-time storage.
2. Repeat charging 2 to 3 times will make the battery reach its best capacity. Please replace or charge the battery if battery power is low.
3. When the battery power consumes quickly even if it is fully and correctly charged, that means the battery life is over and please contact your dealer and buy new HQT approved battery.

Antenna Information

- Stubby antenna is suitable for short-distance communication; thin and long antenna will provide best communication performance. Also it is more comfortable to carry on the waist.
- The communication range may be shortened in rainy days or in forest. Please make preparations for that.

Radio Overview

Screen

Remark:

Full
 Power Remaining
 Battery exhausted. Please change battery or charge

Basic Operation

Power On / Off

Rotate the power control button clockwise until a "Du" sound and a "Ka Ta" sound to notice that the radio's power is on; Rotate it anti-clockwise until a "Ka Ta" sound means to be able to turn off the radio.

Volume Adjustment

Rotate the power control button/volume controller clockwise to turn on the radio, rotate further to adjust the volume.

Note: You can monitor background noise under the monitor mode, and then adjust the volume.

Monitor

Weak signal that is hardly heard during normal operation process can be monitored by pressing [SK2].

Volume can be adjusted by rotating the power control button/volume controller even there is lack of signal. Release [SK2] to go back to normal operation.

Make A Call

To make a call, hold down [PTT] key and speak into the microphone with normal voice. Please keep the microphone 5cm away from your mouth.

Note: 1. Hold down [PTT] key and LED glows red, the radio begins to transmit.
2. If LED flashes red, the battery power is insufficient. The radio can not transmit when battery power is not enough for normal operation.

Receive A call

Release [PTT] key when receiving a call. You can hear

some one is calling you while your current channel is still busy. If the calling signal is weak and you have set a higher level squelch level you would probably not hear anything.

Emergency Alert

This function is enabled by key settings. Long press [SK1] to open the function. The radio will send out alarm code and make alarm sound. Alarm code will be sent time after time during every alarm period.

FM Radio

Enter the FM radio Mode by input FM radio frequency or menu options

Dual Audio Decoding

The machine has dual audio coding function; you can input number under launch state or other function.

Flashlight

Factory default settings: short-press SK1 key, light is flashing; Long-press SK1 key, light is always on (used for lighting).

Side Key Custom-setting

User can set customization features for SK1, SK2 through programming software.

(1) Long-press can set following function:

OFF, Monitor momentary, Stopwatch, Scan, FM Radio, QT Scan, Alarm, Flashlight.

(2) Short-press can set following function:

OFF, Monitor, Stopwatch, Scan, FM Radio, QT Scan, Flashlight.
