**ACCEPTANCE TEST PROCEDURE SPECIFICATION FOR THE T2CAS TT-950/951/952
COMPUTER UNIT, PART NO. 9000000-10001, -20001, -55001**

1. SCOPE

This acceptance test procedure specification (ATP) establishes the manufacturing and operational requirements that the T2CAS TT-950, TT-951, TT-952 Computer Unit, Part No. 9000000-10001, 9000000-55001, and 9000000-20001 must meet to ensure that the unit is in proper operating condition.

2. REFERENCE DOCUMENTS

2.1 These documents are not required for performance of the test procedure. The purpose of listing these documents is to provide an aid for troubleshooting should any discrepancies occur during the performance of the test procedure.

EB7517987 Product Test Software Release Numbers and CRCs

3. GENERAL INFORMATION

3.1 General Requirements

All tests shall be performed under the following conditions:

Temperature = 25+/- 5 Deg C

Relative humidity = 95% maximum

Pressure = between 20 and 32 in Hg

4. POWER REQUIREMENTS

4.1 115 V ac, 400 +/- 10 Hz, 200 W minimum, voltage variable from 90 to 140 V ac.

4.2 28 Vdc, 200 W minimum, voltage variable from 16 to 35 V dc.

5. TEST EQUIPMENT

5.1 TCAS 2000 MTS – Part No. T336255 Mod B

- Aircraft interface unit – Part No. T336253
- RF interface unit – Part No. T335254
- PDL panel – Part No. T336259
- Tray assembly – Part No. T336255-26

5.2 T2CAS PC Test Software – Part No. 9000237

- Identified equipment is included in TCAS 2000 MTS, P/N T336255 Mod B

5.3 T2CAS TAWS Card Test Station –

- TAWS Processor Test Fixture – Part No. 9000117-001
- Emulator – Wind River Vision Ice II
- Power Supplies – Part No. 9000118-001
- PC – Standard PC running Windows 9x, 2000, or NT
- Cables
 - Part No. 9000288 (APM Cable)
 - Part No. 9000227 (Test Discretes Cable)
 - Part No. 9000289 (RS232 Cable)
 - Part No. 9000290 (PCI Bus Test Adapter)
 - LATTICE Part No. pDS4102-DL2 LATTICE adapter cable (connects to parallel port on PC, other end has straight single in-line Berg pin header with pin 5 cut out for keying)

					CAGE CODE	1WYD3	REV LTR
				SEE THE TITLE PAGE FOR PROPRIETARY AND DATA RIGHTS NOTATIONS.			
Rev Ltr	Test No.	Operator limits	Test Description			Work Steps	

- Software
 - VisionCLICK Rev. 7.90A from Wind River (used to load IO_FPGA and HBIT files)
 - LATTICE ispVM System Software version 12.0 (used to program CPLD)

5.4 T2CAS Miscellaneous Test Equipment

- ATA 8840 Extraction Tool – used to extract TAWS CCA from UUT
- TAWS extender CCA – Part No. 9000070-001
- EDDIT Tool – Part No. 9000286-102 (Software used to verify T2CAS software loads)

6. TEST SETUP

6.1 Power up the MTS and allow it to warm up appropriately. Verify that test equipment used is calibrated and functioning properly.

6.2 Connect the test equipment to the UUT. Set IEEE-488 addresses as follows (in Hex):

* Aircraft interface unit (A2 CCA in AIU)	16
* Aircraft interface unit 2 (A4 CCA in AIU)	17
* RF interface unit	25
* HP 8648B signal generator	19
* Cal instruments AC power supply 2001L	01
* HP 8990A peak power analyzer	07
* HP 6032A DC power supply	05
* HP34970A Data Acquisition Switch Unit	09
* HP34970A Data Acquisition Switch Unit	10
* HP34970A Data Acquisition Switch Unit	11
* HP34970A Data Acquisition Switch Unit	12

7. TEST REQUIREMENTS

7.1 Within each section of the test procedure (indicated by an underlined title in the Test description and Work Steps columns) the test steps shall be performed in the order listed. In the event of failure and repair, the section must be performed again from the beginning. It is allowable for the sections requiring user interaction to be grouped together and run in a different order than that specified.

7.2 All control settings or external connections that are altered during the course of a section of the procedure shall be returned to their initial settings before starting a new section of the procedure.

7.3 This procedure is intended to be performed by a knowledgeable technician or engineer. It is assumed that the equipment will be energized and de-energized as appropriate when changing connections and setups.

7.6 The following is a description of the intended interpretation of the column headings:

<u>Column</u>	<u>Description</u>
Rev Ltr	Revision letters are used to identify revised material.
Test No.	Tests are numbered in sequence.
Opr Limits	Unit under test (UUT) shall meet these limits when tested at other than the manufacturing facility. When an item is marked OPTIONAL, the corresponding test is not required except as an aid in troubleshooting.
Test Description	These items are the parameters to which the UUT was designed and aid in troubleshooting by specifying the input and output signal terminals. All conditions required are not repeated for each test, and conditions established in previous test also supply.
Switch Pos	Positions to which switches must be set are listed in required order and are grouped to correspond to applicable Work Steps.
Work Steps	This column defines the operations necessary to perform a test and achieve a result set switches to designated positions before performing a corresponding work step.
Mfg Limits	UUT shall meet these limits at final buyoff before customer delivery.

7.7 Naming Convention for Integrated Test Specification works steps:

<u>Equipment</u>	<u>Reference Name</u>	<u>Descriptions</u>
T336253 Aircraft Interface Unit	AIU	Precedes instructions sent via the IEEE 488 to the AIU as specified
T336254 Radio Frequency Interface Unit	RFIU	Precedes instructions sent via the IEEE 488 to the AIU as specified
T336259 Program Data Link Unit	PDL	Precedes instructions to use inputs/outputs on the Program Data Loader panel.
T336255 Manual Test Station	MTS	Precedes instructions to make measurements or manual changes on the Station.
Personal Computer	PC	Precedes instructions to use the personal computer keyboard input.
Personal Computer Monitor	CRT	Precedes instructions to view a value on the personal Computer video screen or evaluate a return from the UUT.
Unit Under Test	UUT1	Precedes instructions sent to the Unit Under Test via RS-422.
Unit Under Test	UUT2	Precedes instructions sent to the Unit Under Test via ARINC-429
+28VDC Power Supply	PSDC	Precedes instructions sent to DC power supply via IEEE 488Bus.

115 VAC 400 HZ Supply

PSAC Precedes instructions sent to AC power supply via IEEE 488Bus.

7.8 The T2CAS Computer Unit shall be tested using product test software as specified in Table 7-3 for the TCAS portion of the UUT and the product test software as specified in this document for the TAWS portion of the UUT. Instructions for loading the TAWS product test software appear in this document in the test steps using the TAWS extender card, UUT, and the MTS. Instructions for loading the TCAS product test software and operational software are given in Appendix A.

1.0 Load Firmware into CPLD on TAWS CCA –

Click on the shortcut icon (9000237) on the desktop.
 Log in with employee number and password
 Load CLPD on TAWS CCA using Lattice Software on the MTS using the following steps:
 Insert CPLD CDROM (P/N 9100003-001) into MTS PC CDROM drive.
 Make sure UUT power is off on the MTS.
 Install TAWS CCA into extender card on UUT. Make sure jumpers/straps are installed on J8 on CCA.
 Connect cable (cable with straight single in-line Berg pin header with pin 5 cut out for keying) to J5 on CCA (J5 is located in center of CCA)
 Open Lattice (ispSystem).
 Get the file to be programmed (CPLD software P/N 9000230-002). This file is located on CDROM (P/N 9100003-001) (file name 9000230_002.jed, scan chain file is 9000230_002.xcf).
 Power-up the UUT by selecting ADL.
 Wait until Files to Upload ... window opens.
 Click on GO to download the file into the CPLD.
 After the download is complete, power-down the UUT by clicking CANCEL on Files to Upload... window, then click on OK.
 Unplug J5.

2.0 Load IO_FPGA software into TAWS CCA

Load IO_FPGA software into TAWS CCA on the MTS using the following steps:
 Insert IO_FPGA CDROM (P/N 9100003-001) into emulator PC CDROM drive.
 Make sure UUT power is off on the MTS.
 Install TAWS CCA into extender card on UUT. Make sure jumpers/straps are installed on J8 on CCA.
 Connect emulator cable (cable labeled with powerpc dual-in-line connector) to **P1** using adapter board as shown in Figure 2.
 Power-up the emulator (switch is on rear). There should be a blinking light (debug) on the front of the emulator box when the emulator is ready.
 On the emulator PC: Open program visionClick (system) Vision Software II\ and Vision 7.0. Make sure the IP address listed matches the IP address marked on the emulator box.
 Power-up the UUT by selecting ADL.
 Wait until Files to Upload ... window opens.
 Click on Reset (in the VisionSoftware window). The system should respond with >BKM in the terminal network window.
 Open the TF Flash Program Window.
 Load IO_FPGA software into TAWS CCA on the MTS by selecting (SELECT) the path where the software P/N 9000231-003 resides on CDROM (P/N 9100003-001) (file name IO-BLD10.FGA).
 SET the Bias to 7FB00000; OK;
 Enter the erase and program range:

ACSS	AW/CRITICAL NOTATION		
		SUPPLEMENTS	11
	SECURITY NOTATION		PAGE

ENGINEERING SPECIFICATION			SECURITY NOTATION	SPEC NO.	8000253-001	B
				CAGE CODE	1WYD3	REV LTR
			SEE THE TITLE PAGE FOR PROPRIETARY AND DATA RIGHTS NOTATIONS.			
Rev Ltr	Test No.	Operator limits	Test Description		Work Steps	

SET 7FB00000 to 7FCFFFFF; select Erase to 0x; and then click; Erase and program (see readme file for details on loading in its folder).
 Look for Complete. Click OK.
 Close TF FLASH PROGRAMMING Window.
 Click: RESET
 Response: >BKM in the terminal network window
 After the download is complete, power-down the UUT by clicking CANCEL on Files to Upload... window, then click on OK.

3.0 Load HBIT P1 processor boot software into TAWS CCA

Load HBIT P1 boot software into TAWS CCA on the MTS using the following steps:
 Insert HBIT CDROM (P/N 9100002-001) into emulator PC CDROM drive.
 Make sure UUT power is off on the MTS.
 Install TAWS CCA into extender card on UUT. Make sure jumpers/straps are installed on J8 on CCA.
 Connect emulator cable (cable labeled with powerpc dual-in-line connector) to **P1** using adapter board as shown in Figure 2.
 Power-up the emulator (switch is on rear).
 There should be a blinking light (debug) on the front of the emulator box when the emulator is ready.
 On the emulator PC: Open program visionClick: (system) VisionSoftware II \ and vision 7.0
 Make sure the IP address listed matches the IP address marked on the emulator box.
 Power-up the UUT by selecting ADL.
 Wait until Files to Upload ... window opens.
 Click on Reset (in the VisionSoftware window). The system should respond with >BKM in the terminal network window.
 Open TF Flash Program Window.
 Load HBIT for P1 by selecting (SELECT) the path where the software P/N 9000229-002 002 resides on CDROM (P/N 9100002-001) (file name hbit_p1.bin).
 SET the Bias to -80000000: OK;
 Enter the erase and program range SET 7FF00000 to 7FFFFFFF;
 Select erase to 0x;
 Click Erase and program (see readme file for details on loading in its folder).
 Look for Complete. Click OK.
 Close TF FLASH PROGRAMMING Window.
 Click: RESET
 Response: >BKM in the terminal network window.
 After the download is complete, power-down the UUT by clicking CANCEL on Files to Upload... window, then click on OK.

4.0 Load P1 mini Data Loader software into TAWS CCA

ACSS	AW/CRITICAL NOTATION		
		SUPPLEMENTS	12
	SECURITY NOTATION		PAGE

ENGINEERING SPECIFICATION			SECURITY NOTATION	SPEC NO.	8000253-001	B
				CAGE CODE	1WYD3	REV LTR
			SEE THE TITLE PAGE FOR PROPRIETARY AND DATA RIGHTS NOTATIONS.			
Rev Ltr	Test No.	Operator limits	Test Description		Work Steps	

Load P1 mini Data Loader software into TAWS CCA on the MTS using the following steps:
 Insert HBIT CDROM (P/N 9100002-001) into emulator PC CDROM drive.
 Make sure UUT power is off on the MTS.
 Install TAWS CCA into extender card on UUT. Make sure jumpers/straps are installed on J8 on CCA.
 Connect emulator cable (cable labeled with powerpc dual-in-line connector) to **P1** using adapter board as shown in Figure 2.
 Power-up the emulator (switch is on rear).
 There should be a blinking light (debug) on the front of the emulator box when the emulator is ready.
 On the emulator PC: Open program visionClick: (system) VisionSoftware II \ and vision 7.0
 Make sure the IP address listed matches the IP address marked on the emulator box.
 Power-up the UUT by selecting ADL on the menu bar.
 Wait until Files to Upload ... window opens.
 Click on Reset (in the VisionSoftware window). The system should respond with >BKM in the terminal network window.
 Open TF Flash Program Window.
 Load P1 Mini Data Loader by selecting (SELECT) the path where the software P/N 9000229-002 resides on the CDROM (P/N 9100002-001) (filename dl_p1.bin).
 SET the Bias to 7F800000: OK;
 Enter the erase and program range SET 7F800000 to 7FAFFFFFF;
 Select erase to 0x;
 Click Erase and program (see readme file for details on loading in its folder).
 Look for Complete. Click OK.
 Close TF FLASH PROGRAMMING Window.
 Click: RESET
 Response: >BKM in the terminal network window.
 After the download is complete, power-down the UUT by clicking CANCEL on Files to Upload... window, then click OK.

5.0 Load Voices software into TAWS CCA

Load Voice software into TAWS CCA on the MTS using the following steps:
 Insert HBIT CDROM (P/N 9100002-001) into the emulator PC CDROM drive.
 Make sure UUT power is off on the MTS.
 Install TAWS CCA into extender card on UUT. Make sure jumpers/straps are installed on J8 on CCA.
 Connect emulator cable (cable labeled with powerpc dual-in-line connector) to **P1** using adapter board as shown in Figure2.
 Power-up the emulator (switch is on rear).
 There should be a blinking light (debug) on the front of the emulator box when the emulator is ready.
 On the emulator PC: Open program visionClick: (system) VisionSoftware II \ and vision 7.0
 Make sure the IP address listed matches the IP address marked on the emulator box.

Power-up the UUT by selecting ADL.
 Wait until Files to Upload ... window opens.
 Click on Reset (in the VisionSoftware window). The system should respond with >BKM in the terminal network window.
 Open TF Flash Program Window. Load Voice software into TAWS CCA on the card test station by selecting (SELECT) the path where software P/N 9000229-002 resides on CDROM (P/N 9100002-001) (file name phrase.bin).
 SET the Bias to 0; OK;
 Enter the erase and program SET 78000000 to 781FFFFFF.
 Select erase to 0x.
 Click erase and program (see readme file for details on loading in its folder).
 Look for Complete. Click OK.
 Close TF FLASH PROGRAMMING Window.
 Click: RESET
 Response: >BKM in the terminal network window.
 After the download is complete, power-down the UUT by clicking CANCEL on Files to Upload... window, then click on OK.

6.0 Load HBIT P2 processor boot software into TAWS CCA

Load HBIT P2 boot software into TAWS CCA on the MTS using the following steps:
 Insert HBIT CDROM (P/N 9100002-001) into the emulator PC CDROM drive.
 Make sure UUT power is off on the MTS.
 Install TAWS CCA into extender card on UUT. Make sure jumpers/straps are installed on J8 on CCA.
 Connect emulator cable (cable labeled with powerpc dual-in-line connector) to **P2** using adapter board as shown in Figure 2.
 Power-up the emulator (switch is on rear).
 There should be a blinking light (debug) on the front of the emulator box when the emulator is ready.
 On the emulator PC: Open program visionClick: (system) VisionSoftware II \ and vision 7.0
 Make sure the IP address listed matches the IP address marked on the emulator box.
 Power-up the UUT by selecting ADL.
 Wait until Files to Upload ... window opens.
 Click on Reset (in the VisionSoftware window). The system should respond with >BKM in the terminal network window.
 Open TF Flash Program Window.
 Load HBIT for P2 by selecting (SELECT) the path where the software P/N 9000229-002 resides on the CDROM (P/N 9100002-001) (file name hbit_p2.bin).
 SET the Bias to -80000000: OK;
 Enter the erase and program range SET 7FF00000 to 7FFFFFFF;
 Select erase to 0x;
 Click Erase and program (see readme file for details on loading in its folder).

				CAGE CODE	1WYD3	REV LTR
			SEE THE TITLE PAGE FOR PROPRIETARY AND DATA RIGHTS NOTATIONS.			
Rev Ltr	Test No.	Operator limits	Test Description		Work Steps	

Look for Complete. Click OK.
 Close TF FLASH PROGRAMMING Window.
 Click: RESET
 Response: >BKM in the terminal network window.
 After the download is complete, power-down the UUT by clicking CANCEL on Files to Upload... window, then click OK.

7.0 Load P2 mini Data Loader software into TAWS CCA

Load P2 mini Data Loader software into TAWS CCA on the MTS using the following steps:
 Insert HBIT CDROM (P/N 9100002-001) into the emulator PC CDROM drive.
 Make sure UUT power is off on the MTS.
 Install TAWS CCA into extender card on UUT. Make sure jumpers/straps are installed on J8 on CCA.
 Connect emulator cable (cable labeled with powerpc dual-in-line connector) to **P2** using adapter board as shown in Figure 2.
 Power-up the emulator (switch is on rear).
 There should be a blinking light (debug) on the front of the emulator box when the emulator is ready.
 On the emulator PC: Open program visionClick: (system) VisionSoftware II \ and vision 7.0
 Make sure the IP address listed matches the IP address marked on the emulator box.
 Power-up the UUT by selecting ADL.
 Wait until Files to Upload ... window opens.
 Click on Reset (in the VisionSoftware window). The system should respond with >BKM in the terminal network window.
 Open TF Flash Program Window.
 Load P2 mini Data Loader by selecting (SELECT) the path where the software P/N 9000229-002 resides on the CDROM (P/N 9100002-001) (file name dl_p2.bin).
 SET the Bias to 7FC00000: OK;
 Enter the erase and program range SET 7FC00000 to 7FEFFFFFF;
 Select erase to 0x;
 Click Erase and program (see readme file for details on loading in its folder).
 Look for Complete. Click OK.
 Close TF FLASH PROGRAMMING Window.
 Click: RESET
 Response: >BKM in the terminal network window.
 After the download is complete, power-down the UUT by clicking CANCEL on Files to Upload... window, then click on OK.
 Remove jumpers from J8 on TAWS CCA
 Remove TAWS CCA from extender card.
 Remove extender card from UUT.
 Install TAWS CCA in UUT.

			Test UUT using MTS.			Test the UUT on the MTS using the following steps.	
						MTS: Insert UUT into mount. Connect APM to 9 pin connector attached to ARINC600 connector on MTS tray as shown in Figure 3.	
						MTS: Connect cable to UUT PDL front connector as shown in Figure 3.	
						Make sure Compact Flash card is installed in T2CAS UUT.	
						On the desktop, click on the shortcut icon for the 9000237 software.	
						Log in with employee number and password	
						Go to File, Select, Open	
						Select sequence file 9000237.squ	
						Load bench test software (Product Test Software) using the instructions in Appendix A.	
						Click on Test UUT. Enter UUT information	
						Select UUT Part number from Menu selection (9000000-10001, -20001, or -55001)	
						Select Final as test type	
						Select ATP Revision letter as B
