Letter of Similarity

To whom it may concern,

The purpose of this letter is to state the similarity between the BS500 and the BS510. Both of these product numbers are under the FCC ID: P8M-BS500 and IC: 8549A-BS500 certification. The BS500 and BS510 are both electrically identical, the only difference is the SIM card used in the product. The BS500 uses an ATT SIM card and the BS510 uses a Verizon SIM.

Additionally, the RF test report data (Intertek Reports 103017087LEX-023.1 and 103017087LEX—004) from the previous generation, BS-400 (FCC ID: P8M-BS400 and IC: 8549A-BS400) is being leveraged as the BS500 and BS510 are electrically identical to the BS-400.

Thank You,

Gordon Murray
