Compliance Certification Services
47173 Benicia Street
Fremont, CA 94538
Attn: Certification Department

As requested, here are the differences between the following products.

Premier Guard

Premier Pro

1. All three systems use the same circuit boards.
2. All three systems use the same external 24vac power transformer unit.
3. All three systems use the same external PLCU (controller unit).
4. Premier Guard and Premier Pro housings are made of the same Plexiglas type material.
5. The Premier Pro is a wider unit so that it can house a larger antenna for greater tag detection range (approximately 4.5 feet on either side of the pedestal).

I trust this satisfactorily answers your questions. If not, please feel free to call me directly.

Sincerely,

Mac Copas
CCTV Sales Manager
