**Overall Assessment Letter for RF Solutions Ltd Firefly Transmitter
FCC id: P9OFIRE001**

I have reviewed this application and find it compliant.

This is an original application for a remote control transmitter. The equipment is a short range device operating at 433.92 MHz which is used for applications such as lighting control and general purpose remote switching.

Please note the following:

As a result of the assessment review an external photo, internal photo and block diagram exhibit were requested as well as a user manual to include the FCC 47CFR Part 15 Regulatory Statements. The test report was requested to be updated to include information pertaining to Part 15.231(c) regarding occupied bandwidth. A description of the circuit functions of the device and antenna details was also obtained. The applicant was also requested to provide an agents letter.

I underwent the FCC RF exposure training at BABT in July 2007.

Yours sincerely

Vina Kerai
Compliance Engineer, BABT
