

Hi Tim,

As stated in the previous response, the graphic is representative of the device (they are old photos and apparently can't be revised) and should not be taken as presenting the FCC ID. The correct ID is indicated on pages 10 and 17, as well as the presented FCC Label exhibit.

The same FCC ID is applicable under the modular approval.

Sorry if I'm overstating the obvious - at this point I'm not sure what else you are looking to see. Perhaps you can give me a call when you get a chance and help me to understand better what is needed.

Thanks!

Brian

Subject: RE: Review of Eka Systems, Inc., FCC ID: P9X2400B after recent uploads

Brian,

Unless I am missing something, I do not see any changes to Page 10 & 12 or 17.....Still lower case "b" (11 and 12). As for page 17, this may be a different device - but appears this FCC ID may not be correct....

Tim
