July 8, 2002

RE: CC&C TECHNOLOGIES INC.

FCC ID: PANBT0101M

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The Label contains a space between the Grantee Code and Equipment Product Code. Please provide an updated label with the space removed.
- 2) Since the output power is so low, the RF exposure statements are not as restrictive. Please remove the following from the users manual (the co-location statement must stay):

" This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 2.5 cm between the radiator & your body."

- 3) Since the output power is so low, please remove the reference to the 2.5 cm distance in the RF exposure exhibit (Section 2 & 6.2) and change the classification to only say that it is a portable device.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
