March 26, 2003

RE: C&C Technologies, Inc.

FCC ID: PANBT0230

I have a few comments on this Application.

- 1.) Please review the RF Exposure report. A gain of 3dBi is not 1.26 numeric.
- 2.) In general, spectrum analyzers do not make very accurate power meter. Could you kindly repeat the RF Pout test using a peak power meter.
- 3.) Rule 15.35(b) specifies how both peak and average readings are compared to the limits. The peak value of 105.5dBuV is more than 20dB above the average value of 75.9dBuV at 2480MHz. Therefore, comparison with respect to the 75.9dBuV measured average value is in error. Please review your band edge measurements for comparison to the limit.
- 4.) Please provide a local representative for the Declaration of Conformity. See 2.909(c)(2) and 2.909(c)(3) for further guidance.

William H. Graff
President and Examining Engineer
