June 30, 2004

RE: CC&C Technologies, Inc.

FCC ID: PANBT0260

I have a few comments on the above referenced Application.

General

- 1) Please provide a Test Report for this application.
- 2) The RF exposure information shows a conducted output power of 9.48 dBm (8.872 mW). However the users manual states an output power of 13 dBm is typical. There is a concern that the device may not have been tested at the highest output value. Please review and correct any exhibits as necessary.
- 3) The users manual does contain RF exposure information, but does not mention the 20 cm requirement as is required for a mobile device. Please correct.

Timothy R. Johnson  
Examining Engineer
