RE: Application for FCC ID: PAV1131I, IC:6384A-P12382

To whom it may concern:

The enclosed documents constitute a formal submittal and application for Equipment Authorization for a low power FM transmitter pursuant to the following rules:

Subpart C of Part 15 of FCC Rules (CFR 47), Intentional Radiators  
RSS-Gen Issue 3, December 2010, "General Requirements and Information for the Certification of Radiocommunication Equipment"  
RSS-210, Issue 8, December 2010, "Low-power Licence-exempt Radiocommunication Devices (All Frequency Bands): Category I Equipment"

There are two model numbers for the Industry Canada approval. The P11312 has the same radio circuitry as the P12382. They differ in the way that that audio input comes from the MP3 player. The P11312 connects to an Apple iPod via the 30pin connector. The P12382 connects to any MP3 player via the analog audio output.

National Technical Systems – Silicon Valley, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact National Technical Systems – Silicon Valley for assistance.

Sincerely,

Mark Hill  
Staff Engineer  
National Technical Systems – Silicon Valley
