Ently confidential be permanently withheld from public rietary information not customarily released to the public. Eterm confidential be withheld from public view for a Authorization and prior to marketing. This is to avoid any or release of the product to the public. Applicant is also
aware that they are responsible to notify	y ACB in the event	information regarding the product or the product is made nts listed above for public disclosure pursuant to FCC
	ch time that IC disti	nguishes between Short Term and Permanent mply be marked Confidential when submitted to IC.
Sincerely,		
Ву:		
Manager Certification		Thomas Ring

¹ - The asterisked items (*) require further justification before permanent confidentiality will be allowed. These also currently require review by the FCC under their Permit-But-Ask policy before the grant is issued and can delay completion of an application. Further justification should be added to the note above. One such example for a potted device would be: "The EUT is FULLY potted using a non-removable epoxy based material. Removal of potting material causes irreparable damage to internal circuitry. See photographs exhibits that outline the device before and after potting."
