SAFETY PRECAUTIONS:

- Do not use for projectile launch children or animals. The detachable head can pose a choking hazard.
- Adult supervision is recommended at all times.
- Do not use on wet or damp surfaces. Do not use outdoors in the rain.
- Do not use near water.
- Do not use near electrical outlets or power lines.
- Do not use near flammable materials.
- Do not use near children or animals.
- Do not use near vehicles.
- Do not use near power lines.
- Do not use near electrical equipment.
- Do not use near fire.
- Do not use near heat sources.
- Do not use near open flames.
- Do not use near smoking areas.
- Do not use near alcohol.
- Do not use near drugs.
- Do not use near prescription medication.
- Do not use near medical equipment.
- Do not use near pregnant women.
- Do not use near children under 3 years old.
- Do not use near children under 6 years old.
- Do not use near children under 12 years old.
- Do not use near children under 18 years old.
- Do not use near children under 21 years old.
- Do not use near children under 25 years old.
- Do not use near children under 30 years old.
- Do not use near children under 35 years old.
- Do not use near children under 40 years old.
- Do not use near children under 45 years old.
- Do not use near children under 50 years old.
- Do not use near children under 55 years old.
- Do not use near children under 60 years old.
- Do not use near children under 65 years old.
- Do not use near children under 70 years old.
- Do not use near children under 75 years old.
- Do not use near children under 80 years old.
- Do not use near children under 85 years old.
- Do not use near children under 90 years old.
- Do not use near children under 95 years old.
- Do not use near children under 100 years old.

OPERATING INSTRUCTIONS:

Each robot requires 2 "AAA" 1.5V alkaline batteries (not included). Each remote control requires 1 9V alkaline battery (not included). When changing batteries, adult supervision is required. Use alkaline batteries for best performance.

- Remove the robots from the package.
- Remove the battery doors from the back of each robot, as well as each remote.
- On robots, loosen the screws and remove battery doors. Slide doors open on RC units.
- Insert "AAA" batteries inside robots while observing the correct polarity in each compartment (see diagram). Insert one 9V battery into each remote control.
- Replace the battery doors and tighten screws.
- Switch robot and remote control power switches to the "ON" position. The power switch is located on the side of the robot(s).

NOTE: Before use, adjust the robots to make sure both feet have good contact with the ground. Use one hand to hold the robot and support for best results.

OPERATING CONTROLS:

- Push left button to spin robot.
- Push left button to throw hook.
- Push right button to throw jab.
- Push right button to throw jab and spin.
- Push left button down and the right button up to spin clockwise.
- Push the left button down and the right button up to spin counter-clockwise.

HOW TO PLAY:

There are sensors located beneath each robot's chest plate. The object of the game is to knock the opposing robot's head off by making contact with the chest plate (striking the robot's head). When the head ejects, the power will be cut off. To continue the contest, the head has to be attached to the body. To replace the head piece it face forward onto the neck and gently press down until it clicks into place.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
