

***Mealstream Series 5 CTM3 208v 60Hz
FCC Approval***

Additional Information

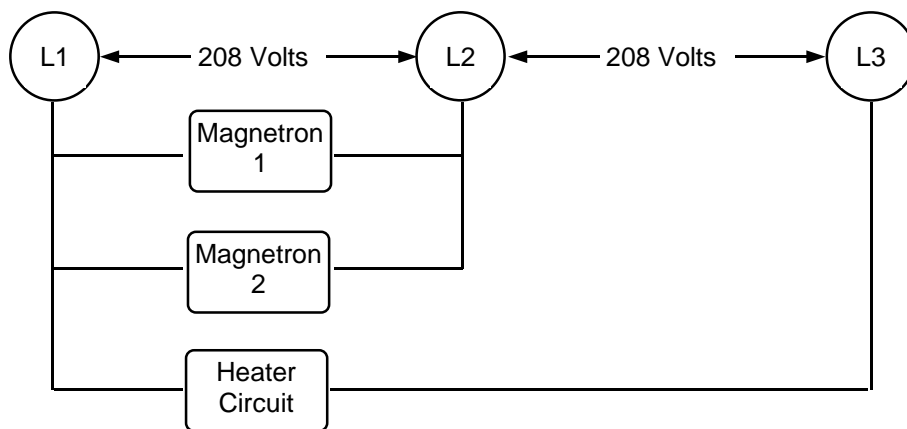

Technical Data

- | | | |
|---------------------------|---|--------------|
| 1) Power Supply | - | 208v @ 60 Hz |
| 3) Max Supply Power | - | 6.25 Kw |
| 3) Output Microwave Power | - | 1425 w |
| 4) Output Convected Power | - | 3000 w |
| 5) Frequency | - | 2.405 GHz |

Single Phase

Three Phase

Description

A small modification can be made to the 208v 60 Hz unit to enable the units to run on a three phase supply.

In single phase both the magnetrons and the heater circuit are run on the same phase.

In three phase the heater is run on the third phase alone. This is done by removing a link to the terminal block.

Please note that this modification will take place when the oven is in production.
