RF Exposure Info

In case of Radio or Television Interference

This equipment generates and uses radio frequency energy and if not installed and operated correctly, in strict accordance with the manufacturer's instructions, may cause harmful interference to authorized radio communication services. It has been type tested and found to comply with the limits for Part 18.307 conducted emissions for non-consumer equipment and Part 18.309 radiated emissions, which are designed to provide reasonable protection against such interference. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:

- 1) Reorient the receiving antenna.
- 2) Relocate the microwave with respect to the receiver.
- 3) Plug the microwave into a different outlet so that the receiver and microwave are on different branch circuits.

If necessary the user should consult the dealer or an experienced radio/television technician for additional suggestions.

Note: Modifications should only be carried out by the manufacturer or authorised representative to ensure continuing conformance.
