To Whom It May Concern:

#### RE: Class I Amendment to Existing Certification FCC ID: PCVCTM3246015A and PCVCTM3206015A

Please be advised that Merrychef Limited intend to introduce modifications to the control keypad graphics that will be included in the production process for the above-referenced equipment since equipment authorization was granted.

The changes are of a cosmetic nature only and will not affect EMC performance parameters of the equipment since the same membrane construction is retained, only the front appearance changes. These changes are therefore deemed Class I permissive changes.

Appendix 1 shows the appearance of the various options of the new graphics layout.

Note that there are 3 new variants of the membrane control panel. Each of the 3 variants can be used on the base model of the products carrying FCC ID: PCVCTM3246015A or FCC ID: PCVCTM3206015A, depending on the customer requirement.

To distinguish each variant, Merrychef allocate a suffix to the Merrychef Product Part Number as follows:-

CTM3206015A TH1E	(208V, 60Hz Tim Horton's English membrane control panel and logo on oven door)
CTM3246015A TH1E	(240V, 60Hz Tim Horton's English membrane control panel and logo on oven door)
CTM3206015A TH2E	(208V, 60Hz Unbranded English membrane control panel and <u>no</u> logo on oven door)
CTM3246015A TH2E	(240V, 60Hz Unbranded English membrane control panel and <u>no</u> logo on oven door)
CTM3206015A TH1F	(208V, 60Hz Tim Horton's French membrane control panel and logo on oven door)
CTM3246015A TH1F	(240V, 60Hz Tim Horton's French membrane control panel and logo on oven door)

I trust the information contained in this letter is acceptable to you, but please do not hesitate to contact me if you should require further clarification

Yours sincerely

Paul Harrison
