**Re: Certification Application
FCC ID: PCV CTM82086DK2US
Modification Letter**

To Whom it May Concern

Please be advised that one of the components has become obsolete since the EMC Projects Limited Test Report P3332/1 was compiled.

The component, a small synchronous motor will now be replaced by the same type as used on the Mealstream Series 5 208V 60Hz (FCC ID: PCV CTM3206015A) and Menuflex 208V 60Hz (FCC ID: PCV MF120603A) described in the compliant EMC Projects Limited Test Report Nos. P2888/2 and P3133/2.

This modification is deemed to have no detrimental effect on the radiated or conducted emissions of the product due to its low frequency of operation (60Hz) and low operating current which is less than 50mA. The fundamental (operational) characteristic of the original and replacement component are identical and are physically similar in size.

Thank you for your attention to this matter.

Yours sincerely

Paul Harrison
