To whom it may concern:

The enclosed documents constitute a formal submittal and application for Equipment Authorization for modular approval for a 2.4GHz Spread Spectrum device pursuant to the following rules:

Subpart C of Part 15 of FCC Rules (CFR 47)
RSS-Gen Issue 2, June 2007, "General Requirements and Information for the Certification of Radiocommunication Equipment"
RSS-210, Issue 7, June 2007, "Low-power Licence-exempt Radiocommunication Devices (All Frequency Bands): Category I Equipment"

The device is a module meeting all of the requirements for modular approval. Two versions of the product are being submitted under two different IDs and UPNs. The first is for full single modular approval with installation by the OEM or system integrator – FCC ID **PD9112BNH** and UPN **1000M-112BNH** – **for model number 112BNHMW**.

The second, under FCC ID **PD9112BNHU** and UPN **1000M-112BNHU** (Canadian Model # 112BNHU), is for a limited single modular approval allowing installation by the end user into devices that have a BIOS lock to ensure that the module is only used in approved systems. Descriptions of the BIOS lock associated with this approval for two different integrators have uploaded as part of the operational description and are to be held confidential.

Elliott Laboratories, as duly authorized agent prepared this submittal. A copy of the letter of our appointment as agent is included with the application.

If there are any questions or if further information is needed, please contact Elliott Laboratories for assistance.

Sincerely,

Mark Briggs
Staff Engineer
