Federal Communications Commission  
7435 Oakland Mills Road  
Columbia, Maryland 21046

Subject: FCC ID: PD94965AG

Gentlemen:

Please be advised that the Intel Corporation FCC ID: PD94965AG, Intel® Wireless WiFi Link 4965AGN Model 4965AG\_ is manufactured for the global market as a client only device without radar detection in the UNII spectrum and is identical to Intel Corporation FCC ID: PD94965AGN, Intel® Wireless WiFi Link 4965AGN and falls under the same product family, but when labeled for marketing in North America (FCC ID: PD94965AG) the Intel® Wireless WiFi Link 4965AGN Model 4965AG\_ EEPROM will be flashed at the factory to disable 802.11n function and to only operate on these specific channels:

Channels 1-11, 2412-2462MHz 802.11b/g mode  
Channels 36-64, 5180-5320MHz 802.11a mode  
Channels 149-165, 5745-5825MHz 802.11a mode

This information when flashed into the EEPROM will not be accessible and can not be changed by the end user.

The Intel® Wireless WiFi Link 4965AGN Model 4965AG\_ will be calibrated to the following limits at the factory measured with a power meter and average power sensor:

Channels 1-11 at 15.5dBm, in 802.11b/g mode  
Channels 36 -64, at 16.5 dBm, in 802.11a mode  
Channels 149-165, at 17.5dBm, in 802.11a mode

The Intel® Wireless WiFi Link 4965AGN Model 4965AG\_ will not pass functional tests and be shipped from factory if the conducted output power exceeds the limits listed above. The end user will not be given the capability to adjust output power to exceed the above listed limits.

If you have any questions please do not hesitate to contact us at 503-712-8076

Sincerely,

Marissa Faustino  
Compliance Engineer
