6731 Whittier Ave., Suite C110
McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for a Modular approval of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This is a Class B Computing Device Peripheral approval of the Intel® Centrino® Ultimate-N 6300 (MN: 633ANHMW, FCC ID: PD9633ANH), which is a WLAN adapter (802.11a, 802.11b, 802.11g, and 802.11n). It was tested installed in an extender board connected to the host laptop's PCI-E slot with a set of Shanghai Universe Communication Electron Co.,Ltd. Antennas continuously transmitting form Chain A, B, and C antenna ports.

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

A handwritten signature in blue ink, appearing to read "J. Candelas".
