Subject: Model 8260NGW WLAN 802.11a/b/g/n/ac + BT 4.0 Adapter Card
          FCC ID: PD98260NGH and PD98260NGHU

Gentlemen:

Please be advised that for the Model 8260NGWH WiFi/Bluetooth card all final output power levels and operational parameters are programmed into the non-volatile memory (NVM) during the assembly process. The information programmed into the NVM is not accessible and cannot be changed by the end user/installer in any way. Since there are no end user/installer adjustments that can be made there is no tune-up procedure provided.

If you have any questions please do not hesitate to contact me at your convenience.

Sincerely,

Steven C. Hackett
