Ref: FCC Class II Permissive change for FCC ID: **PD9AX200D2L**

Dear Examiner,

This is to request a Class II permissive change for module approval FCC ID: **PD9AX200D2L**, originally granted on **03/04/2019**.

Change #1: This change is add a new antenna type for a monopole antenna (AWAN part # DQ60AML001) and a Loop type (AWAN part # DQ60YF0006). This will be used for mobile applications with a minimum of 20cm separation between antenna and user. All antenna gains are equal or less than those approved originally. This permissive change is not adding specific host conditions at this time. The PC used in this testing was a representative system used for radiated spurious emissions testing.

Sincerely,

By:
