

### **EVALUATION REPORT**

EUT Description WLAN and BT, 2x2 PCIe M.2 2230 SD adapter card

Brand Name Intel® Wi-Fi 6E AX411

Model Name AX411NGW

FCC ID PD9AX411NG

Date of Test Start/End 2024-04-26 / 2024-04-26

802.11ax, Tri Band, 2x2 Wi-Fi 6E + Bluetooth® 5.2

+ CDB (Concurent Dual Band simultaneous wi-fi connection)

(see section 3)

Applicant Intel Corporation SAS

Address 425 Rue de Goa – Le Cargo B6 – 06600 Antibes, FRANCE

#### 2. General conditions, competences and guarantees

- ✓ Intel Corporation SAS Wireless RF Lab (Intel WRF Lab) is an ISO/IEC 17025:2017 laboratory accredited by the American Association for Laboratory Accreditation (A2LA) with the certificate number 3478.01.
- ✓ Intel Corporation SAS Wireless RF Lab (Intel WRF Lab) is an Accredited Test Firm recognized by the FCC, with Designation Number FR0011
- ✓ Intel WRF Lab only provides testing services and is committed to providing reliable, unbiased test results and interpretations.
- ✓ Intel WRF Lab is liable to the client for the maintenance of the confidentiality of all information related to the item under test and the results of the test.
- ✓ Intel WRF Lab has developed calibration and proficiency programs for its measurement equipment to ensure correlated and reliable results to its customers.
- ✓ This report is only referred to the item that has undergone the test.
- ✓ This report does not imply an approval of the product by the Certification Bodies or competent Authorities.

## Annex A. Evaluation Description

#### A.1 RF Exposure Limit

According to the FCC part 1.1310:

- For operations within the frequency range of 300 kHz and 6 GHz (inclusive), the limits for maximum permissible exposure (MPE), derived from whole-body SAR limits and listed in the table below.

#### Limits for Maximum Permissible Exposure (MPE) (TABLE 1 TO §1.1310(E)(1))

Frequency range (MHz)	Electric field strength (V/m)	Magnetic field strength (A/m)	Power density (mW/cm <sup>2</sup> )	Averaging time (minutes)			
	(ii) Limits for General Population/Uncontrolled Exposure						
0.3-1.34	614	1.63	*(100)	<30			
1.34-30	824/f	2.19/f	*(180/f2)	<30			
30-300	27.5	0.073	0.2	<30			
300-1,500	-	-	f/1500	<30			
1,500-100,000	-	-	1.0	<30			

f = frequency in MHz. \* = Plane-wave equivalent power density.

For the purpose of this evaluation, a distance of 20cm was used to calculate the equivalent plan wave power density, to be compared with the limit described in the table above:

$$S_{eq} = \frac{P_{avg} \cdot G}{4 \cdot \pi \cdot R^2}$$

Where:

 $S_{eq}$  = Equivalent Plane Wave Power Density

 $P_{ava}$  = Average Power at antenna terminals in Watts

G = Gain of the Transmitting Antenna

R =Distance from the Transmitting Antenna in meters

#### A.2 Exposure from source with Multiple Frequencies

If the device is designed such that more than one antenna can functionally transmit at the same time, the RF exposure evaluation shall be conducted while all antennas are transmitting. The individual exposure level ratios shall be totaled and used for compliance purposes.:

$$\sum \frac{S_{eq_i}}{S_{Limit_i}} < 1$$

# Annex B. RF Exposure Evaluation Results

#### **B.1** Declared Maximum Output Power

According to the applicant, the maximum conducted transmit power (including the upper tolerance) for the EUT under evaluation are as follows:

Mode	Max Output Power (incl. Tolerance) (dBm)		
UNII 6GHz	20.50		
BT	11.50		

#### **B.2** RF Exposure Evaluation Results

#### **Power Density Calculations**

Mode	Highest Power Density @ 20cm (mW/cm²)	Limit (mW/cm²)	Verdict
UNII 6GHz	0.08	1.00	Р
BT	0.01	1.00	Р

**Collocated Power Density Calculations** 

	,		
Mode $\sum \frac{Power\ Density}{Limit}$		Ratio Max	Verdict
WLAN + BT	0.17	1.00	Р

P: Pass F: Fail

NM: Not Measured NA: Not Applicable

#### B.2.1 UNII 6GHz and BT

Band	Avg Power [dBm]	Peak antenna Gain (dBi)	EIRP Avg [dBm]	EIRP Avg [mW]	Power density @ 20cm [mW/cm²]	Limit [mW/cm <sup>2</sup> ]	Ratio (Power density/Limit)
UNII 6GHz	20.50	5.59	26.09	406.44	0.08	1.00	80.0
ВТ	11.50	3.54	15.04	31.91	0.01	1.00	0.01

### Test Report N° 230704-01.TR44

The maximum exposure for collocated transmitters is:

Band	Ratio (Power density/Limit)	∑ Ratio <sub>i</sub>	Limit
UNII 6GHz	0.08		
UNII 6GHz	0.08	0.17	1.00
Bluetooth	0.01
