Annex A. Test & System Description

A.1 Measurement System

Measurements were performed using the following setups, made in accordance to the general provisions of FCC KDB 905462 D02 UNII DFS Compliance Procedures New Rules v02.

The EUT was installed in a test fixture and this test fixture is connected to a laptop computer and AC/DC power adapter. A second computer was used to configure the access point on the DFS channels; a channel was selected randomly by the access point. To enable channel loading, data is streamed between the EUT laptop and the second computer.

Annex B. Test Results

The herein test results were performed by:

Test case measurement	Test Personnel
DFS	Thomas GAMAIN

B.1 Test Conditions

The EUT power supply was provided by the Extender test board, $V_{\text{nominal}} = 3.3 V_{\text{DC}}$.
The software PROSet/Wireless was used to set the EUT in normal operation mode.

B.2 Test results for Dynamic Frequency Selection (DFS)

Test procedure

The conducted setup shown on *Section A.1* was used to measure the Channel Closing Transmission Time and Channel Move Time.

The *Client Device* (UUT) is set up to associate with the *Master Device*. Data is streamed between the *Master Device* and the *Client Device*. Radar test waveforms generated with the vector signal generator are injected into the *Master* on the operating channel above the DFS detection threshold. Observations are done on the transmissions of the UUT at the end of the radar burst on the Operating Channel for a duration greater than 10 seconds. We measured the transmissions from the UUT during the observation time, after radar detection occurs the Channel Move Time and Channel Closing Transmission Time are recorded.

Results tables

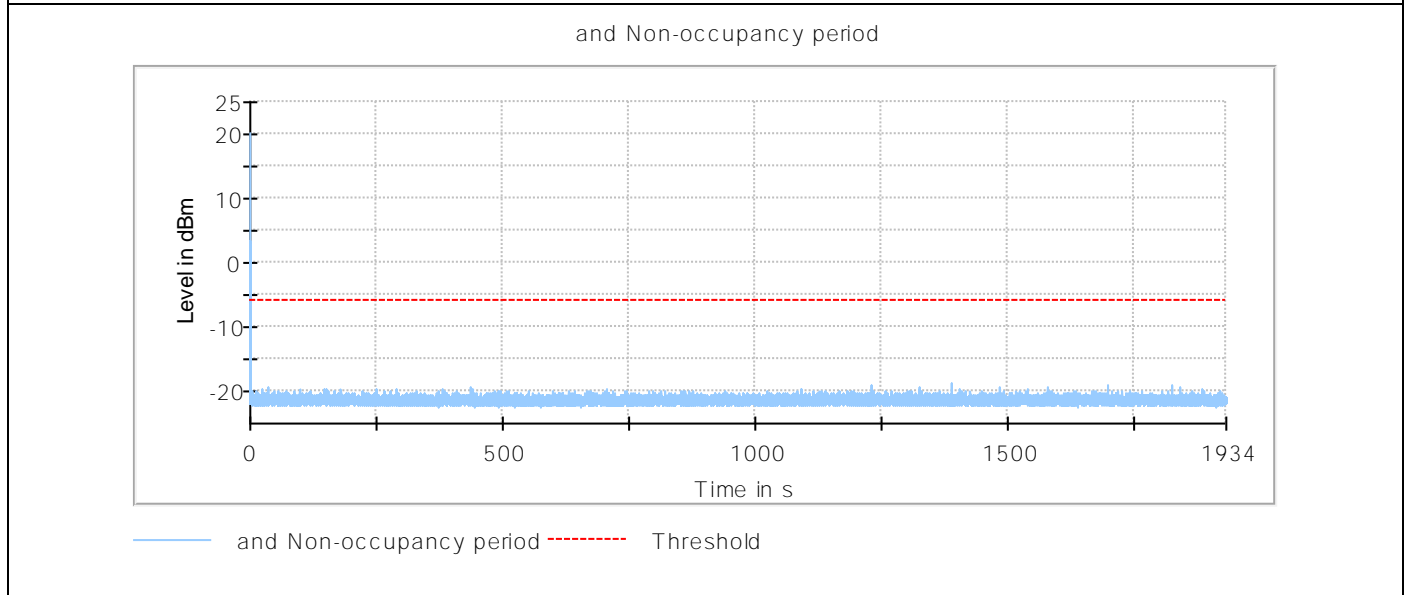

Tested Channel: 64, Frequency: 5320 MHz

Test item	Results	Limit
Transmit Test Duty Cycle	1.740%	-
Channel Closing Transmission Time	<25.400ms	200 ms + an aggregate of 60ms over remaining 10 seconds period.
Channel Move Time	609 ms	10 seconds
Non-Occupancy Period	32 minutes	Minimum 30 minutes

Channel move time < 10s, test PASS

No transmission of any type has occurred for 30 minutes, test PASS
