Ref: FCC Class II Permissive change for FCC ID: PD9BE201NG

Dear Examiner,

This is to request a Class II permissive change for module approval FCC ID: PD9BE201NG, originally granted on 03/13/2024 under mobile configuration and on 05/06/2024 under portable configuration.

Change #1: This change establishes portable category SAR conditions for the Acer model N24C9 Notebook PC with antennas part number 81EAB515.G39 (DC33002WX00) and 81EAB515.G40 (DC33002WX10).

- The WLAN TAS feature is enabled on 2.4GHz and 5GHz band. The exact same WLAN authorized modules are reused in this notebook with the exact same TAS algorithm validation methods for time averaging SAR as approved by FCC.

- For the listed antennas. The PC systems categorized as portable regarding FCC Part 2.1093 and IC RSS-102 chapter 3 satisfies the conditions based on modular stand-alone SAR evaluation with 5mm antenna to user separation distance. The most conservative SAR conditions shown in Table-1 demonstrate compliance with the RF exposure evaluation requirements. Criteria in Table-1 is based on the reported results included in the application granted 05/15/2024.

Table-1: Most Conservative SAR condition

Requirement	
Minimum reported antenna to user distance	5 mm
Maximum reported WLAN SAR value	0.80 W/kg (1g)

Yours Sincerely,

Benjamin Lavenant  
Wireless regulatory Engineer
