February 18, 2003

RE: Intel Corporation

FCC ID: PD9WM3B2100

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Please provide photographs of the Aquila PIFA antennas used with the device.
- 2) Please provide a photograph that shows the cable length between the device and the antenna for both sets of antennas. Please label this information on the photograph.
- 3) Previous maximum power was 47.1 mW (16.73 dBm). Current power measured in the test report is shown as 40.2 mW (16.04 dBm). The FCC expects the conducted output power for a permissive changed to be within 0.5 dB of the original power.

Timothy R. Johnson
Examining Engineer

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
