AEGIS LABS inc.

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for FCC Class II Permissive Change certification of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This Class II Permissive Change is for approval of the Intel PRO/Wireless 2100 Network Connection (MN: WM3B2100) with a set of Yokowo (Mallow) antennas to the approved FCC ID: PD9WM3B2100, which is a single band WLAN adapter (802.11b).

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Rick Candelas
