# Reference Antenna Kit for Intel<sup>®</sup> PRO/Wireless LAN Mini-PCI Adapters

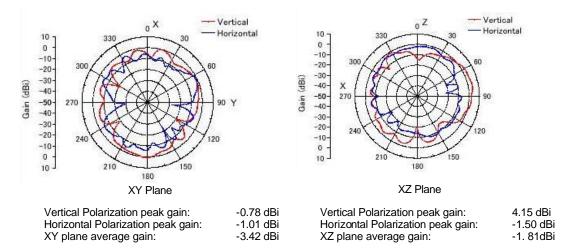

The Intel<sup>®</sup> PRO/Wireless LAN Mini-PCI adapter (models: 5000, 7100 and 2100) requires an embedded antenna in a notebook PC or other platform where the adapter is used. It is recommended that the antenna have similar characteristics to the antenna specification described in this technical reference sheet. The antenna detailed in this document is designed for operation in both 802.11a and 802.11b radio spectrums (i.e. 2.4 GHz and 5 GHz). Note: only the 5 GHz is required. This antenna is available with a 400mm (20-inch) connect cable from the external vendor as detailed on the back page.

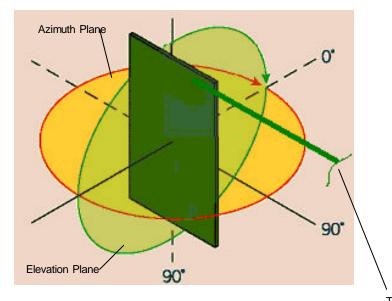

The antenna directivity patterns in the azimuth XY and XZ planes are displayed below at both 2.4 GHz and 5.2 GHz.

### 2.4 GHz (802.11b) Range (Frequency: 2.45 GHz. Power: 5dBm)

#### 5 GHz (802.11a) Range (Frequency: 5.25 GHz. Power: 5dBm)

The Hitachi-Cable antenna is constructed from rolled copper with Kapton tape on both sides. This configuration yields thin radiating elements. A Hitachi-Cable coax is directly soldered to the structure as shown above. The antenna can be mounted in the rear of the laptop LCD panel. The following shows the 2.4 GHz and 5 GHz Band Free-Space Azimuth Pattern.

## **Antenna Specifications**

| Frequency Range           | 802.11b – 2.4 – 2.5 GHz    |
|---------------------------|----------------------------|
|                           | 802.11a – 5.15 – 5.35 GHz  |
| Nominal Peak Antenna Gain | 0 dBi                      |
| Polarization              | Linear, vertical           |
| Input VSWR                | <2.0:1 Max                 |
| Input Feedpoint Impedance | 50 ohms                    |
| Maximum Power Input       | 10 watts                   |
| Static Protection         | Element and Feed           |
|                           | are recommended            |
| Regulatory Approvals      | FCC Parts 15B and 68,      |
|                           | UL, C-UL, Industry Canada, |
|                           | CE Approval, VCCI (Japan), |
|                           | ETSI.                      |
| Width                     | 30.98 mm                   |
| Length                    | 30.54 mm                   |
| Height                    | 1.29 mm                    |
|                           |                            |

To Hirose U.FL Connector

## **Antenna Cable**

The connector on the opposite end of the connect cable from the antenna, is a Hirose U.FL. connector. This connector cable and antenna assembly is designed specifically for use with Intel<sup>®</sup> PRO/Wireless 5000, 7100 and 2100 Mini-PCI Adapters.

The cable specifications are:

- Diameter 1.13 mm
- Length 400 mm

#### **Measured Gain**

The Hitachi-Cable dual-band elements were measured with 400mm (20-inch) of coaxial cables. It is estimated that this length of cable attributes ~4 dB of loss.

|              | With Cable Loss |             | Without Cable Loss (assumed 4 dB) |             |
|--------------|-----------------|-------------|-----------------------------------|-------------|
| Percent Gain | 2.4 GHz         | 5.2 GHz     | 2.4 GHz                           | 5.2 GHz     |
| 95%          | -8.00 dBi       | -6.7600 dBi | -4.00 dBi                         | -2.7600 dBi |
| 90%          | -2.66 dBi       | -6.1200 dBi | +1.34 dBi                         | -2.1200 dBi |
| 80%          | -1.23 dBi       | -3.6900 dBi | +2.77 dBi                         | +0.3100 dBi |
